Summary

A mid-level experienced full-stack developer with over 4 years of experience in building scalable web applications and delivering innovative solutions with expertise in Javascript and React. Also experienced in working with Java, C and Python. Adept at designing and optimizing backend systems using Node.js, Express.js, SQL Databases, and NoSql Databases, while leveraging modern tools like Docker, AWS, and CI/CD pipelines. Proven leadership as a Head of the Tech Department at Cosonas Ltd., delivering secure, high-performance software.

Passionate about creating user-focused applications and enhancing development efficiency. Currently pursuing a BEng in Computer Science at Anglia Ruskin University.

Skills

Programming Languages: Python, Java, JavaScript, TypeScript, React, React Native

Backend: Nodejs, Expressjs, Restful APIs

Database: PostgreSQL, MongoDB, MySQL

Tools and Technology: Git, AWS, Docker, CI/CD, Material UI, Ant Design

Professional Experience

FullStack Developer, Cosonas Limited. – London

September 2024 – Present

- Designed and Developed responsive user interfaces using React, Material UI, and other modern tools, focusing on performance and user experience.
- Developed server-side logic using Node.js, and Express.js, and optimised database management with SQL/MySQL.
- Managed databases (SQL, MySQL), optimising data storage and retrieval processes.
- Led tech teams to deliver high-quality software, ensuring timely delivery and seamless collaboration using Git.
- Monitored and improved app security, performance, and reliability, reducing reported bugs.
- Ensured adherence to industry standards and security policies throughout development processes.

Software Engineer, Naijaways Global Services – Lagos

Jan 2022 – May 2024

- Built and maintained web applications using MERN stack, integrating responsive UIs with React.js and Typescript.
- Developed RESTful APIs and integrated services like Twilio, Nodemailer, AWS, and Docker to enhance functionality.
- Designed and optimised MongoDB databases, improving performance through efficient schema design and indexing.
- Deployed applications on AWS with CI/CD pipelines, ensuring a smooth and efficient development process.
- Implemented unit tests and robust error handling, reducing post-deployment issues and production downtime.

Intern Backend Developer, DevCareer Africa – Lagos

Sep 2021 – Dec 2021

- Collaborated with senior developers to design and build scalable back-end services using Node.js and Express.js.
- Assisted in the creation of APIs, ensuring secure and efficient data exchange between client applications and servers.
- Gained hands-on experience with Git for version control and participated in code reviews to improve project quality.

Projects

Ratokunbo

[Ratokunbo](#)

- Collaborated with a team on Ratokunbo, an e-commerce startup, creating tailored online shopping solutions for Nigeria's market for foreign used goods.
- Built and optimized backend systems using Express.js, Mongo Atlas, Docker, Amazon ECS, and S3, enhancing scalability, reliability, and cost efficiency.

Education

Anglia Ruskin University - Cambridge

Jan 2024 - Present

BEng. Computer Science
